USP-T

IV JORNADAS DE ASTROFÍSICA ESTELAR In honor to Dr. Zulema González de López García June 22nd to 24th 2022, Tucumán, Argentina

1st Announcement

San Miguel de Tucumán, August 3rd 2021

Dear Colleagues,

We are pleased to invite you to participate in the "IV Jornadas de Astrofísica Estelar" (IV Conference on Stellar Astrophysics) that will be held at Universidad San Pablo-T in the city of San Miguel de Tucumán (Argentina) between June 22nd and 24th, 2022.

The first "Jornadas de Astrofísica Estelar" (JAE) were held in 2008 at the Observatorio Astronómico de Córdoba (OAC), followed by a second edition in 2011 in the city of Tafí del Valle (Tucumán), and a third edition in Córdoba in 2016. The main objective of these conferences is to create a propitious space to promote interactions between national and international researchers and students, dedicated to the scientific research in the area of Stellar Astrophysics. On this occasion, the fourth edition of the JAE will be held in honor of the academic career of Dr. Zulema González de López García, a recognized specialist in stellar atmosphere models.

Given the worldwide health situation, the organizing committee is evaluating using the virtual modality if it is not possible to hold the meeting in person. In future announcements we will be communicating what the modality will be according to how the situation evolves regarding the COVID-19 pandemic.

We will be announcing the deadline for title and abstract submission for talks and posters contributions in future circulars.

Hoping to count all of you among the participants, we cordially greet you,

Organizing Committee

PRE-REGISTRATION

In order to optimize the available resources, we have created a pre-registration form for all those interested in participating in this fourth edition of the JAE. We kindly ask you to complete it before November 28, 2021. The form is available at this [Link](#).

CONFIRMED SPEAKERS:

- Saul Adelman, Department of Physics, The Citadel, Estados Unidos
- Melina Cecilia Bersten, Instituto de Astrofísica de La Plata, Argentina
- Iván Bustos Fierro, Observatorio Astronómico de la Universidad Nacional de Córdoba, Argentina.
- Sylvia Ekström, Department of Astronomy, University of Geneva, Suiza
- Yilen Gómez Maqueo Chew, Instituto de Astronomía, Universidad Nacional Autónoma de México, México
- Gerardo Juan Manuel Luna, Instituto de Astronomía y Física del Espacio, Argentina
- Steven Margheim, NSF's National Optical-IR Astronomy Research Laboratory, Gemini Observatory, Chile
- Jorge Meléndez, Departamento de Astronomia, Universidade de São Paulo, Brasil
- Mónica Oddone, Observatorio Astronómico de la Universidad Nacional de Córdoba, Argentina
- Markus Schöller, European Southern Observatory, Garching, Alemania
- María Eugenia Veramendi, Facultad de Filosofía, Humanidades y Artes Universidad Nacional de San Juan, Argentina

ORGANIZING AND SCIENTIFIC COMMITTEE:

- Mercedes Gómez, Observatorio Astronómico de la Universidad Nacional de Córdoba, CONICET (co-chair).
- Olga Pintado, Centro de Tecnología Disruptiva, Universidad San Pablo, Tucumán (co-chair).
- Lydia Cidale, Instituto de Astrofísica de La Plata (IALP, CONICET-UNLP), Facultad de Ciencias Astronómicas y Geofísicas (UNLP) (co-chair).
- Monica Oddone, Observatorio Astronómico de la Universidad Nacional de Córdoba.
- Romina Petrucci, Observatorio Astronómico de la Universidad Nacional de Córdoba, CONICET.
- Mariel Fregenal, Centro de Tecnología Disruptiva, Universidad San Pablo, Tucumán.

- Álvaro Pérez Ragone, Universidad San Pablo, Tucumán.
- Federico González, Instituto de Ciencias Astronómicas, de la Tierra y del Espacio, CONICET-UNSJ.
- Luciano García, Observatorio Astronómico de la Universidad Nacional de Córdoba.
